Budapest, June 15, 2019

Annual report

Scientific activities

- In April 2019 a symposium on Quality of Life in Chronic Kidney Disease took place in collaboration with the Renal Unit of AHEPA hospital, the Laboratory of Sports Medicine, AUTH, University Health Council and EURORECKD in Thessaloniki, Greece.
- A European scientific collaboration has been launched, the EUSUREX NCT03923972. EUSUREX is a survey comprising 5 questionnaires to describe barriers and status of prescription of physical activity/exercise training within Europe. The questionnaires will explore the following levels: health care system within the country, renal unit, nephrologist, renal nurse and patient. Italy, Greece, Belgium, Estonia, England, Scotland, Sweden, Germany and Spain are currently participating.
- An application to NDT to produce a supplement on physical activity and exercise training in patients with CKD is in process.
- EURORECKD has suggested that the next European Best Practice Guideline (ERBG) should be on physical activity and exercise training in patients in CKD in the survey disseminated by the ERBG committee.

Cooperation with other Societies

- The EURORECKD is endorsed by the ERA-EDTA.
- The EURORECKD's activities are also disseminated on the site of the British Renal Society and a facebook group set up by dr Pelly Koufaki.
- The EURORECKD has a dialogue and cooperation with the EFSMA, European Federation of Sports Medicine Associations, initiated by dr Rolfdieter Krause.
