6. Comments and questions (all regular members).
Formal approval of the EUSUREX study by various ethical committees in the different participating countries is an administrative challenge. Hope is expressed that there is some improvement after the COVID-19 pandemic.
7. Other questions
Interested persons from all over the world joined the meeting and participated in a lively discussion. The collaboration with GREX (Global Renal Exercise Network) opens opportunities to expand the forum, and to further foster initiatives to increase physical activity in patients with chronic kidney disease. Current activities of GREX were presented by Paul Bennett [amongst others: active website and social media with readily available links that clinicians can use, organisations of webinars, Delphi study, exercise recommendations for PD patients, ...]
EURORECKD will explore whether they can set up a database of research interests and activities throughout Europe.
