

We are sad to announce that
EURORECKD has lost one of its founding members

Dr. med. Rolfdieter Krause

born on 2 November 1945, died on 28 June 2019 in Berlin.

Rolfdieter Krause started his career as a doctor of Sports Medicine and served as physician for the German rowing team for many years. He became a nephrologist and integrated his knowledge of Sports Medicine with the needs of patients with chronic kidney disease. He was a pioneer in exercise training and physical rehabilitation for patients on dialysis. Throughout his career he was dedicated to further this cause in Germany, by creating ReNi and internationally by creating the EURORECKD.

He was General Secretary of the EURORECKD since the beginning and was instrumental in creating a platform for EURORECKD's activities in close cooperation with the ERA-EDTA. Rolfdieter Krause was involved and active within the organisation throughout his life and helped plan the activities for the 2019 ERA-EDTA congress in Budapest.

We are truly grateful for his enthusiasm, dedication and for all the time he gave EURORECKD. We have lost a dear friend and colleague. Our thoughts go to his dear wife Christiane, who often joined him on his trips to the ERA-EDTA and EURORECKD activities, and their son Christian.

for the EURORECKD council, July 6, 2019
